

PALLIATIVE CARE FOR ADVANCED NON-MALIGNANT DISEASES (PCAND)

ABOUT US

The Palliative Care for Advanced Non-malignant Diseases (PCAND) is a community of practice of specialist palliative care providers who are providing care to patients with **advanced non-malignant diseases** in the **ambulatory setting**.

The ambulatory setting presents an opportunity to engage specialist palliative care early, especially in the face of the unpredictable trajectories that characterize non-malignant diseases. This community of practice seeks to support its members **clinically, academically, and educationally**.

WHAT WE DO

- Meet virtually 4 times a year
- Discuss program development
- Discuss complex clinical cases
- Collaborate in research
- Provide a forum for ongoing discussion
