

Palliative Medicine Physician

The Embrace Center for Supportive Medical Care (EmbraceSMC) invites applications for Palliative Medicine Physician positions.

EmbraceSMC provides specialist supportive medical care to patients in Toronto and the surrounding area. We provide home-based care through a combination of in person and virtual care.

The successful applicant will work independently, and responsibilities may include consultation and direct care of patients with complex palliative needs, and outpatient palliative symptom management. Our patients are at various stages of life-limiting illness journeys and may be suffering from malignant or non-malignant disease including advancing age and progressive frailty. The applicant will help optimize symptom management, quality of life and comfort as well as provide whole-person centred care including advance care planning.

Qualified applicants will hold an MD degree or equivalent, and must be eligible for licensure with the College of Physicians and Surgeons of Ontario. Further training in Palliative Care, Palliative Medicine Subspecialty Accreditation, advanced training in Care of the Elderly or equivalent training and experience is preferred.

Remuneration will be on a fee-for-service model. The successful applicant will have autonomy to manage their patient-load and schedule. Applicants seeking either full-time or part-time opportunities are encouraged to apply.

Interested applicants may submit their application by email to frontdesk@embracesmc.ca or via the submission form found at www.embracesmc.ca/physicians
